July 8, 2009— We invite you to explore the brand new Charity and Security Network website:

www.charityandsecurity.org

The website provides the latest news, studies and events that impact U.S. charities and foundations in a timely and informative manner. The website has been designed so that users can easily navigate between different issues, from Aid worker safety to safely giving Zakat.

Some of the materials available on www.charityandsecurity.org include:

- a **Resources** page covering pending legislation and proposed regulations, court cases, abstracts of studies and more
- a **Solutions** page providing long-term, sensible solutions that protect people in need of charitable program services
- a **Blog** featuring updated commentary and analysis by Network members

The **Charity and Security Network** coordinates the strategies of charities, grantmakers and advocacy groups working to eliminate unnecessary counterterrorism measures that impede legitimate humanitarian efforts.

Please share this announcement with any of your members or partner groups.

If you have any questions or comments about the site, please let us know at info@charityandsecurity.org. Thank you.
